

Technical Excellence. Delivered in War Mode.

Capability Statement

Varmoda is a Small Business, specialized in providing IT Services, Cybersecurity, System Engineering and AI Implementation & Modernization along with automation, bringing together a trusted ecosystem of 8(a), HUBZone, SDVOSB and WOSB partners to deliver innovative technology solutions to the Government. We combine the reach of a large enterprise with the agility of a small business, backed by CMMC Level 2 Cybersecurity Controls and a DCAA-compliant accounting system, to manage complex, high-volume, mission-critical programs and their regulatory, security and reporting requirements.

Core competencies

- **Artificial Intelligence** - Agentic automation on Copilot Studio and IBM Watson. RAG, LLM guardrails, MLOps, and cost-aware model routing.
- **Data Engineering & Analytics** - Lakehouse on Databricks and Fabric, streaming pipelines, database governance, Power BI, and vector stores for AI.
- **Cybersecurity & AI Defense** - Zero trust, RMF and FedRAMP support, Sentinel and Defender XDR, CMMC readiness, and AI-specific risk controls.
- **Digital Engineering & Automation** - Low-code No Code development on Power Platform, Salesforce and ServiceNow, RPA, API-first integration, CI/CD, and containerized microservices.
- **Multi Cloud Architecture & Engineering** - Azure, AWS and Google Cloud landing zones, Terraform IaC, Kubernetes and OpenShift, migration, and FinOps.
- **Service Desk** - Tier I-III support, ITIL processes, ServiceNow, Salesforce, Zendesk and Dynamics 365 with AI-assisted triage, 24x7x365 service support.
- **Contact Center Optimization** - Cloud contact center, conversational AI, intelligent routing, real-time transcription, and quality analytics.
- **Infrastructure Support** - Microsoft 365 and Azure tenants, Entra ID, Intune and Autopilot, AVD, servers, backup, DR, and asset records.
- **Loan & Grants Management** - Scalable, high-volume systems for financial-assistance programs; full-lifecycle review, O&M, and AI/ML-enabled grants management.
- **Network Architecture & Optimization** - SD-WAN and SASE, zero trust network access, segmentation, IPv6, and AI-assisted monitoring and optimization.

What sets us apart

- **Set aside coverage** - Trusted network of 8(a), HUBZone, SDVOSB and WOSB partners delivering IT Services to Government Agencies.
- **Proven federal delivery** - 95% customer satisfaction with on-time, on-budget performance and earned option/fee awards. Specialized in providing cost effective solutions.
- **Mission-critical scale** - Varmoda's Corporate resources have delivered programs with combined value over \$150M, supporting National Intelligence, Healthcare and research programs throughout their career bringing strong program delivery expertise.
- **Cost Optimization** - Cloud financial operations (FinOps), workflow optimization, no-code delivery that lowers labor cost, and disciplined management of licenses, hardware, assets and Infrastructure saving millions of taxpayer's money.
- **Modernization** - Legacy systems moved to modern platforms with AI applied to ease the work, and no-code applications that are ready to deploy with ATO and cybersecurity packages already in place.
- **Innovation** - AI applied across the enterprise level, agentic automation on Copilot Studio and Foundry, RAG, AI-assisted service desk triage, GitHub Copilot paired development, and AI-driven defense with Sentinel and Defender XDR.
- **Low Code / No Code** - Delivery prioritized on ServiceNow, Pega, Appian, Drupal, WordPress and Wix, cutting development time and cost, with legacy applications modernized onto low-code platforms.
